Summery

Detail-oriented and passionate Full-Stack Developer with a strong foundation in **Java**, **SQL**, **ReactJS**, and **Express.js**. Experienced in building scalable web applications, developing real-time chat platforms, and designing responsive UIs using modern JavaScript frameworks. Successfully completed a web development internship where I independently delivered a responsive frontend and optimized backend workflows. Skilled in RESTful APIs, Firebase integration, database design, and Agile development practices. Seeking to contribute technical expertise and problem-solving skills to innovative software teams. Continuously exploring emerging technologies and best practices to stay up-to-date in modern software development. Comfortable working in Agile environments with a strong collaborative and adaptive mindset. Familiar with cloud deployment and secure coding practices. Passionate about technology-enabled transformation and continuous learning in emerging tech.

Experience

Adsium Innovation

Oct 2023 – Dec 2023

Web Development Intern

Maharashtra, India

- Optimized over 200+ high-resolution images for a real estate platform using Python in Jupyter Notebook (.ipynb), improving page load time by 30%.
- Independently led the development of the **Antik Project**, delivering a fully responsive prototype in 4 weeks responsible for 100% of wireframing, color palette design, and frontend implementation.
- Developed interactive UI using **HTML**, **CSS**, **Tailwind CSS**, **Locomotive Scroll**, and **ScrollTrigger**, ensuring smooth animations and cross-device responsiveness.
- Collaborated in a team of 5 using Git and agile methods; improved delivery speed by 25% through the use of **Generative AI tools** like **ChatGPT** and **DhiWise AI** for converting Figma designs into production-ready React components. .
- Followed **Agile development** processes, participated in **sprint discussions**, and ensured timely deliveries.
- Implemented **secure coding practices** and handled performance-focused optimizations during development.

Projects

Auto Monitor | *ReactJS, REST API, Firebase, useEffect, useMemo, Express.js, Redux Toolkit, Chart.js, YOLOv8* |

- Designed and developed a real-time vehicle monitoring platform using **ReactJS** and **Firebase**, supporting dynamic vehicle data analysis and admin dashboards.
- Integrated a **YOLOv8 Machine Learning model** using **transfer learning** for accurate license plate detection and data extraction for real time computer vision task.
- Optimized **Firebase schema structure**, improving database read/write performance by 40% through efficient indexing and data modeling.
- Built interactive visual dashboards with **Chart.js** to track **traffic**, **revenue**, and **employee workload** in real-time.
- Implemented frontend performance optimizations using **Axios**, **Redux Toolkit**, and React's **useEffect** and **useMemo** hooks.
- Led end-to-end **project management** for the admin control panel—managing employees, monitoring vehicle flow, and analyzing operational revenue data.
- Integrated secure API communication and implemented CORS policies to ensure privacy and cross-origin safety in a real-time system.

Anonymous Web Application (HOOD) | *Socket.io, Express.js, LocalStorage, CORS* |

- Built a real-time, anonymous chat platform that grouped users by **university**, **college**, or **city** for local, identity-free discussions.
- Implemented dynamic **room-based grouping** and seamless **bidirectional communication** using **Socket.IO**.
- Configured strict **CORS policies** and Express middleware to ensure secure, cross-origin request handling between frontend and backend.
- Added a gamified **Movie Meme Guessing Game**, where users match memes to movie titles during their team's turn.
- Used **LocalStorage** to retain user session details across page refreshes, preventing the need to re-enter the chat form.
- Deployed Project on **Render (cloud platform)**, ensuring CI/CD practices and cloud-native availability.

Achievements

- Secured **1st Rank** in the college-level **Project-Based Learning (PBL)** competition.
- Achieved **2nd Rank** in an inter-college **coding competition**.
- Published a research paper at the prestigious **IEEE Conference**.
- Ranked **26th out of 400+ teams** in the **Technoxian World Robotics Championship (Robo Race)**.

Interest

- Curious learner of emerging technologies and programming trends.
- Playing multiplayer battleground games and Ukulele .

Technical Skills

Languages: JavaScript, Java, HTML5, CSS3

Frameworks/Libraries: React.js, Tailwind CSS, Node.js, Express.js, Shery.js, ScrollTrigger, Locomotive.js

Tools: Git, Figma, VS Code, Postman, Firebase, Socket.IO

Cloud/Database: Firebase Realtime DB, MySQL

Cloud/Deployment: Vercel, Netlify, Render, Firebase HostingL

Security: CORS, Secure API Design

Practices: Agile (Scrum), Unit Testing
