Objective

Aspiring Cybersecurity professional with a strong foundation in **Penetration Testing**, **Vulnerability Assessment**, and **Security Monitoring**. Passionate about **Ethical Hacking** and skilled in tools aligned with the **OWASP Top 10** framework. Eager to contribute to a forward-thinking organization by assisting in **Risk Analysis**, **Incident Response**, and **Security Documentation**. Seeking a challenging entry-level role where I can apply my technical skills and academic background to enhance organizational security. .

Experience

Adsium Innovation 📁

Oct 2023 - Dec 2023

Web Development Intern

Maharashtra, India

- Worked on a **real estate website**, contributing to **10%** of the project where I learn to optimize images using an **ipynb** file.
- Led the development of **Antik Project**, working **100%** on the project to bring the concept into a digital format by building a **prototype**. This involved **creating wireframes**, **color matching**, and developing a fully **responsive website**.
- Utilized **HTML**, **CSS**, **Tailwind CSS**, **Locomotive**, and **ScrollTrigger** to build responsive and visually appealing websites.
- Gained experience working with a team and using **AI tools like ChatGPT** and **DhiWise AI** to increase productivity, including converting Figma designs into React websites..

Projects

Auto Monitor | *ReactJS, RestAPI, Firebase, useEffectHook, useMemoHook, Express.js, ReduxToolkit* | 🐙 | Ongoing

4

- **YOLOv8 ML Model**: Built for accurate **Number plate detection** by using **transfer learning**.
- **Optimized Firebase Schema**: Improved **read/write efficiency** with structured data handling.
- **Real-time Graphs**: Used **Chart.js** to visualize **traffic**, **revenue**, and **employee metrics**.
- **Efficient Frontend**: Implemented **Axios**, **Redux Toolkit**, **useEffect**, **useMemo**, and **local storage** for fast performance.
- **Admin Features**: Owner can **add employees**, **track revenue**, and **monitor vehicle flow**.

Anonymus web application (HOOD) | *Socket.io, Express.js, LocalStorage, Cors* | 🐙

4

- **Anonymous Web App (HOOD)**: Built a platform that enables users to join **real-time, anonymous chat rooms** based on their **university**, **college**, and **city**—fostering local student interaction without revealing identity.
- **Socket.IO Based Rooms**: Implemented dynamic **room-based grouping** using **Socket.IO**, allowing seamless **bidirectional communication** among users with shared identifiers.
- **Secure Communication**: Integrated **CORS policy** to handle cross-origin requests and ensure safe and stable connections between frontend and backend.
- **Interactive Movie Meme Game**: Added an engaging game where users guess the **movie name from memes**. Each meme image is mapped to a movie via its filename; correct answers increase the user's score—boosting interaction and retention.

Achievements

- * Completed the web penetration testing course by zSecurity.
- * Achieved **1st Rank** in the Project-Based Learning (PBL) competition at college level.
- * Successfully published a research paper at the prestigious **IEEE Conference**, showcasing our work and innovation.
- * Secured **26th rank** in Technoxian World Robotics Championship at Robo Race event.

Interest

- * Learning new technologies
- * Playing Battleground games

Technical Skills

Languages: JavaScript, Java, Python, C++, HTML5, CSS3

Frameworks/Libraries: React.js, Tailwind CSS, Node.js, Shery.js, ScrollTrigger, Locomotive.js

Tools: Git, Figma, VS Code, Postman, Firebase, Socket.IO

Cybersecurity: Kali Linux, Burp Suite, Metasploit, OWASP ZAP, Hydra, Netcat, Dirb, BeEF, Maltego, Knockpy, Weevely

Cloud/Database: Firebase Realtime DB, MySQL
